South-west Monsoon has caused heavy rainfall in the Cox's Bazar district. Thousands of infrastructures have been damaged due to the adverse weather. The world's largest makeshift city now faces several counts of life-threatening challenges. Due to the heavy showers, flash flood, landslides, water logging, disrupted connection in local accessibility network, and several other problems have occurred in the district. Flash floods and landslides pose a serious threat in Ukhiya and Teknaf areas where the families in the Rohingya camps have been forced to abandon their houses and seek safe shelter in nearby makeshift and comparative high open spaces. In addition, three unions of Ukhiya sub-district and two unions of Teknaf sub-district including Palongkhali, Rajapalong, Jaliapalong and Whykong have been submerged due to heavy rainfall and approximately 16 camps are affected. The floods had come amid a strict national lockdown as Bangladesh battles rising infections and deaths from COVID-19. They also follow huge fires that tore through the camps in March, killing 11 people and destroying thousands of shelters then again the adverse weather, latest landslides and floods further exacerbate the suffering and massive humanitarian needs of the Rohingya refugees in Bangladesh.

Coastal situation: A low pressure area has formed over the North Bay and adjoining areas. Under its influence, deep convection is taking place and steep pressure gradient lies over North Bay and adjoining areas. Squally weather may affect the maritime ports and adjoining coastal areas of Bangladesh. Maritime ports have been advised to hoist local cautionary Signal number three.

This forecast includes rainfall activity only by direct influence of the tropical system which is based on the probable track. Due to the direct influence of the system, Cox's Bazar, Ukhiya and Teknaf could have heavy to very heavy rain along with light to moderate tropical squalls & isolated extremely heavy rainfall in next week.

AREAS AFFECTED BY the RAINFALL

Water logging all around the houses of Camp-16

Pathways inside the camp are under the water

CIS FLOOD RESPONSE

CIS staff, Sohag Hossain had started to raise awareness on flood preparedness, during flood & post flood management issues through hand miking in different blocks of camp-16 & 22. He advised to keep all house hold materials, safe drinking water & dry food items in enough high places from the ground level.

He also told the community to keep all the important papers & ID cards in a plastic bag. Actually these are essential to know to reduce their sufferings of them. CIS had tried to adopt the approach for them along with other humanitarian organization working in the camps.

CIS has found out the homeless or evacuated or other beneficiaries who community and provide dry food items to reduce the food scarcity problem.

The 33 years woman, mother of 5 children, Hasina Begum is one of them and she expressed her gratitude and praised the activities to come forward during their difficult times.

CIS has tried to provide the dry food items to the water logged & evacuated community as much as possible to ensure their food demands in this situation.

Landslide is one of the leading causes of death in this monsoon flush flood in July 2021. CIS staffs Ripon & Shariful Hossain explored the risky low camp areas and counseled the Rohingya people to evacuate the houses as soon as possible.

At least seven Rohingya Muslims, including children, were killed and several others injured after heavy monsoon rains triggered landslides and flooding in refugee camps in southern Bangladesh. CIS tried to help the community & other organization to evacuate the risky areas people to a safe place as soon as possible.
